Board of Directors Meeting Minutes

April 10th, 2024 at 10:00 am via Zoom

1. Call to Order

MCCA President Richard Dutremble called the meeting to order at approximately 10:02 am.

DIRECTORS PRESENT:

Aroostook – Comm. Norman Fournier
Cumberland – County Manager Jim Gailey proxy for Comm. Steve Gorden
Franklin – Comm. Bob Carlton
Hancock – Admin. Mike Crooker proxy for Comm. John Wombacher
Kennebec – Comm. George Jabar
Knox – Comm. Sharyn Pohlman
Lincoln – Admin. Carrie Kipfer proxy for Comm. William Blodgett
Piscataquis – Comm. Paul Davis
Sagadahoc – Admin. Amber Jones proxy for Comm. Charles Crosby
Somerset – Comm. Robert Sezak
Waldo – Comm. Betty Johnson
York – Comm. Richard Dutremble

DIRECTORS ABSENT:

Androscoggin – Comm. Garrett Mason
Cumberland – Comm. Steve Gorden
Hancock – Comm. John Wombacher
Lincoln – Comm. William Blodgett
Oxford – Comm. Steven Merrill
Penobscot – Comm. Peter Baldacci
Sagadahoc – Comm. Charles Crosby
Washington – Comm. Chris Gardner

OTHERS PRESENT:

MCCA Risk Pool - Manager Malcolm Ulmer
MCCA - Admin. Lauren Haven
Piscataquis – Manager Mike Williams
Verrill Dana – Lobbyists Jim Cohen and Brody Haverly-Johndro

2. Consent Agenda:

- 2.1. Approval of the Agenda
- 2.2. Approval of the Minutes
- 2.3. Financial Reports: Lauren Haven

Comm. Fournier **moved** to approve the consent agenda, **seconded** by Comm. Sezak and the motion **passed** with no opposition.

3. Officer Reports:

- 3.1. Secretary/Treasurer, George Jabar
- 3.2. Vice President, Norm Fournier

Comm. Fournier reported on the Chair of the Budget and Finance Committee. MCCA member counties have been given the opportunity to pay their membership dues in two installments. However, all members have paid their full membership dues amount in one installment for 2024. This being the case, President Dutremble had previously requested estimates on CD rates at local banks. The best rate of the seven financial institutions surveyed was from Camden National Bank. It would be a seven-month term at 5.08%. VP Fournier recommended to the Board that we invest \$50,000 in a CD for seven months. Comm. Sezak **moved** to approve the investment upon review of the interest rate following the maturity of the CD. Comm. Fournier said the Board would review the rate after the term and decide at that time whether or not to roll the funds into another CD. Lauren said she would find out. The motion was **seconded** by Admin Mike Williams and the motion **passed**.

3.3. President Report, Richard Dutremble

President Dutremble announced that the next Board of Directors meeting would occur in person at the MCCA offices in Augusta.

4. Standing Committee Reports:

4.1. NACo Update: Peter Baldacci & Sharyn Pohlman

Comm. Pohlman reported that April 30th was a key deadline for US Treasury ARPA reporting. The Quarterly and Annual Project & Expenditure (P&E) Reports will be due in which the expenditure estimates basically lock counties into their plan for the rest of the program.

4.2. Convention Planning Committee (CPC): Lauren Haven

Admin. Lauren Haven reported that the CPC met on April 2nd at the venue for a walk through of the Sugarloaf facility. It is truly a beautiful space for the convention that will easily accommodate all aspects of the meeting from the hotel on site to the training areas, as well as food and fun activities. Comm. Bob Carlton said the Franklin Board of Commissioners will be happy to welcome MCCA to Franklin County for the conference.

4.3. Legislative Policy Committee: Steve Gorden, Chair

4.3.1. James Cohen, Verrill Dana

- Legislative Update
- Next Steps

Lobbyist Jim Cohen reported that four million dollars for Medically Assisted Treatment was kept in the supplemental budget that was passed. In his opinion, even if it was not enough, four million was better than two million, and much better than nothing.

The pay increase for Maine State Police (MSP) passed which will help with hiring and retention. The budget included 32 new positions combined closing the gap on other open positions and providing more rural patrol coverage. It will not provide full coverage as identified in existing call sharing arrangements, but it will reduce overtime for troopers, which has been an issue. The week prior, the Appropriations Committee cut the requested 32 positions in half. It is unclear what exactly this will mean. It was thought that coverage will move around and Washington County, which is underserved, will not be given an additional position. If the Governor agrees this number is insufficient, the request for more positions can be made again.

Mr. Cohen said there were a number of significant divergences. Many decisions were being made in the middle of the night on Saturday. Comm. Fournier asked if adjournment was scheduled for next Wednesday. Jim noted that many bills have not even come out of committee yet and a lot of ground needs to be covered before adjournment. Norm asked if a vote was needed to extend the session or could the Governor simply call them back into session. Mr. Cohen said once the legislature is in session, it can stay in session for as long as it takes. There would definitely be a veto day scheduled at some point. Per diem cost comes into play in that case.

Lobbyist Brody Haverly-Johndro reported that the Legislature passed the bill to provide funding for more public defender offices and employees in an effort to improve the state's

insufficient indigent legal system. As a result, the pre-trial backlog will be reduced. The bill regarding courthouse facilities failed to pass. However, this would probably be a state expense rather than a county expense.

Jim said the next steps will be to set up legislative priorities for the future session. There would be opportunities for the jail standards committee, so we need to work on ideas now. Comm. Sezak suggested developing a questionnaire to send to all the candidates. The Legislative Policy Committee (LPC) needs to get together to come up with questions that should be included. The timeline should be July and August to develop this. If we can get their ear, we will understand who will be responding to us going forward.

5. Association Reports - MACCAM, MARP, MRODA, MSA, others.

MSA: Admin. Carrie Kipfer reported that she attended the MSA conference last month and they had a great speaker.

There were no other association reports given.

6. Adjournment 10:30

President Dutremble *invited a **motion** to adjourn at approximately 10:30 a.m. Comm. Sezak made the **motion, seconded** by Comm. Fournier, and the motion to adjourn was **approved**.*

Respectfully submitted,

MCCA Administrator, Lauren Haven

Attested:

MCCA Secretary-Treasurer, George Jabar

MAINE COUNTY COMMISSIONERS ASSOCIATION

April 2024 Financial Report

Attached please find the financial reports for the month of April 2024. The Balance Sheet shows the total assets and liabilities at \$252,596.75. This amount includes \$12,470.28 from the money market account MCCA established for MainePERS employer contributions. It also shows the NACo dues collected for the state of Maine were withdrawn from our account.

Debits to the bank account in April totaled \$45,763.12, and \$905.60 was credited to the checking account. The credits were from one of the directory ads and accrued interest on the checking account. There were also a few transactions for the National Administrators Association that were a wash. The funds were deposited and withdrawn within the same month. The debits in April were from normal operating expenses during the month and you may note the increased amount is reflected in the reports for the updated office space lease agreement. At this time, we have spent 27 percent of the annual budget and received 70% of the budgeted income for the year.

Additional details of financial transactions appear in the *Profit & Loss Budget vs. Actual, Transaction Detail, Expenses by Vendor*, and *Profit & Loss Previous Year Comparison* reports. Please don't hesitate to contact me with any questions and let me know if you would like to see anything presented differently in the financial reports.

Respectfully submitted,

Position Summary. The Geological Society of America (GSA) supports the conservation of Geoheritage sites to meet present and future educational, scientific, aesthetic, cultural, and economic needs.

This position statement provides a communication tool that (1) summarizes the consensus views of GSA on the conservation of Geoheritage sites; (2) describes what Geoheritage sites are and why they are important; (3) encourages alignment of U.S. initiatives with international Geoheritage, geoconservation, and geodiversity programs (e.g., UNESCO Global Geoparks Network, International Union for Conservation of Nature Geoheritage Specialist Group, IUGS Commission on Geoheritage); and (4) advocates coordinated development of partnerships and strategies for creating and conserving Geoheritage sites across the United States.

CONCLUSIONS AND RECOMMENDATIONS

- *Recognize and support designation and appropriate management of Geoheritage sites.* These sites are not only scientifically important, but also offer the potential for supporting local and regional economies through tourism and other businesses that embrace sustainable development. Governing bodies, particularly those at a local level, can play a key role in conserving Geoheritage sites for the public benefit.
- *Encourage collaboration and partnerships to identify, designate, and manage Geoheritage sites.* Collaboration among the geologic community, local and regional governments, and private interests can be most effective in promoting appropriate designations and management strategies for both existing Geoheritage sites and areas in need of Geoheritage designation and management.
- Recognizing the diversity of Geoheritage across the United States. Every region has opportunities to identify, characterize, and develop preservation and management plans according to local interests and needs. These initiatives can be developed in a coordinated manner, following established best practices in Geoheritage planning and management as outlined in the America's Geoheritage II: Identifying, Developing, and Preserving America's Natural Legacy: Proceedings of a Workshop (2021) report. All geoscientists can be encouraged to contribute; the geoscience community as a whole will realize the benefits of universal access to Geoheritage sites.

RATIONALE

“Geoheritage” is a generic but descriptive term applied to sites or areas of geologic features with significant scientific, educational, cultural, and/or aesthetic value (<https://www.americasgeoheritage.com/geoheritage/>). Geoheritage sites are important to the long-term health of the geoscience professions, to preserve sites of geoscience importance related to Earth processes, Earth history, and history of geologic thought; to recruit and train the next generation of geoscientists; and to engage the general public by demonstrating the relevance and importance of geology to societal interests. *Scientifically and educationally significant Geoheritage sites* include those with textbook geologic features and landscapes, distinctive rock or mineral types, unique or unusual fossils, or other geologic characteristics that are significant to education and research. *Culturally significant Geoheritage sites* are places where

geologic features or landscapes played a role in cultural or historical events. *Aesthetically significant Geoheritage sites* include landscapes that are visually appealing and inspire a sense of awe and wonder.

Geoheritage sites serve the public interest. Such sites are critical to advancing knowledge about natural hazards, groundwater supplies, soil processes, climate and environmental changes, evolution of life, mineral and energy supplies, and other aspects of the nature and history of Earth. Such sites have high potential for scientific studies, use as outdoor classrooms, enhancing public understanding of science, recreational use, and economic support to local communities. Many Geoheritage sites are tourist destinations that provide local and regional economic benefits.

Geoheritage sites can be small but scientifically significant. Such sites may include a road cut or named and managed sites of a few acres. Geoheritage sites can also be extensive areas with international recognition, such as the Grand Canyon and Yellowstone National Parks. Geoheritage sites may be located on privately owned land, tribal land, on land in public ownership ranging from municipalities to the federal government, or on land of mixed ownership. Large or small, and regardless of ownership, many are vulnerable to urbanization, infrastructure development, agriculture, over-use, or erosion. Conservation strategies appropriate to the type of site and nature of ownership are important to protect and maintain Geoheritage sites for the long-term interests of both geologic and civic communities.

Geoheritage sites in the United States include officially designated landmarks and areas with a high level of distinct conservation management, such as national parks, monuments, historic landmarks, natural landmarks, and World Heritage Sites. Many of these areas were designated because of their distinct geologic features, geologic history, or combination of both. Federal land-management agencies, such as the National Park Service (NPS), Bureau of Land Management (BLM), and U.S. Forest Service (USFS), manage these sites to conserve their special features and characteristics for future generations. Geologic sites and museums without official Geoheritage designations are also included on the website of the NPS, providing Geoheritage managers the opportunity to “strengthen the connections between Geoheritage sites and encourage the sharing of best management practices nationwide” (<https://www.nps.gov/subjects/geology/unofficial-register.htm>).

Some Geoheritage sites are significant due to unique and outstanding geologic characteristics and cultural history. As such, Geoheritage sites across the United States should be identified and managed for preservation as nonrenewable resources aligned with global geoconservation initiatives. Geodiversity and biodiversity initiatives should be integrated at Geoheritage sites to ensure long-term sustainability of natural ecosystems. Because cultural heritage and history are integral to geoheritage sites, indigenous and local populations should be acknowledged and respected, and their perspectives should be accommodated in the planning, development, and management of these sites. Finally, Geoheritage sites provide opportunities for geotourism, improving public scientific literacy, connecting people to the landscape, instilling a sense of community ownership, and sustaining local economies.

Innovative approaches in conserving Geoheritage sites on public and private lands can be executed by partnerships among state agencies, tribal communities, counties, municipalities, non-governmental organizations, businesses, academic institutions, professional societies, and other private parties. Such efforts will ensure that even small Geoheritage sites, including those without official designations, can be preserved in perpetuity and managed for the use, enjoyment, and scientific advancement of future generations. Geoheritage conservation efforts may provide a source of income for communities through tourism and related uses that incorporate principles of sustainable development.

Adopted April 2012; revised May 2017; April 2022

ABOUT THE GEOLOGICAL SOCIETY OF AMERICA

The Geological Society of America (GSA) (<https://www.geosociety.org>) unites a diverse community of geoscientists in a common purpose to study the mysteries of our planet (and beyond) and share scientific findings. Members and friends around the world, from academia, government, and industry, participate in GSA meetings, publications, and programs at all career levels, to foster professional excellence. GSA values and supports inclusion through cooperative research, public dialogue on earth issues, science education, and the application of geoscience in the service of humankind. Inquiries about GSA or this position statement should be directed to GSA’s Director for Geoscience Policy, Kasey S. White, at +1-202-669-0466 or kwhite@geosociety.org.

OPPORTUNITIES FOR GSA AND ITS MEMBERS TO HELP IMPLEMENT RECOMMENDATIONS

To facilitate implementation of the goals of this position statement, The Geological Society of America recommends that its members take the following actions:

- *Seek opportunities to communicate the value of Geoheritage sites to decision makers and the public.* Legislative bodies, government agencies, private developers, economic development corporations, professional land-use planners, chambers of commerce, professional forums, town hall meetings, and community groups all provide avenues for expanding knowledge of the value of Geoheritage sites. Provide examples of how management of a Geoheritage site has added value to land-use planning, advanced understanding of geologic processes and potential for hazards, or contributed to economic growth. Explain how overlooking Geoheritage has resulted in costly and damaging land use, devastating consequences of natural disasters, or loss of tourist and tax revenues. An informed public can be a powerful force in identifying and designating Geoheritage sites and collaborating on long-term management strategies.
- *Initiate designation of or management strategies for a site in need of preservation.* Identify other parties, such as NGOs and federal agencies, that may benefit from designation of a site or enhanced management of an existing designated site. Promote collaboration and partnerships for determining appropriate designation (e.g., from local park to IUGS Geoheritage Sites), developing management objectives, and sharing costs. Identify benefits for various interests, such as the educational value for local secondary schools, research value for the geologic community, aesthetic value for outdoor enthusiasts, and economic value through tourism and local users.
- *Utilize print, electronic, social, and broadcast media in promoting the value of Geoheritage designations.* When appropriately utilized, the media are effective and efficient communication tools for addressing critical issues associated with Geoheritage conservation. If you are uncertain about how to make contact and work with the media, seek assistance and advice from other GSA members, GSA's Geology and Society Division, or the U.S. Geoheritage Advisory Group.
- *Be alert to local, state, and federal legislation and policy development relevant to Geoheritage or for designation of specific sites.* Get involved by offering expert assistance, commenting, contacting decision makers, sharing this position paper, or soliciting additional expertise. Seek advice from and share information about Geoheritage with GSA's Geology and Public Policy Committee, GSA's Geology and Society Division, and GSA's Director for Geoscience Policy in Washington, D.C.
- *Become engaged in efforts with federal and state organizations, such as NPS and Association of American State Geologists, that may be active in identifying and developing Geoheritage sites.*
- *Propose symposia, technical sessions, and workshops on Geoheritage issues at GSA annual and sectional meetings.* Sharing experiences, successes, and challenges with Geoheritage designations and management will help others in the geoscience community be more effective in their efforts to preserve Geoheritage sites for future generations.
- *Develop educational materials about Geoheritage.* Designing descriptive and explanatory documents, including drawings and pictures, would be helpful to interested parties, such as policy makers, educators, and site managers, for use in handouts, signage, websites, and field trips.

GEOHERITAGE PROPOSAL FOR THE KATAHDIN – NORTH WOODS REGION OF MAINE

*A legacy of Discovery and Contribution to Science and
Education*

Submitted By:

Walter Anderson, DSci., Maine State Geologist, Emeritus (1979-95)

Robert Marvinney, PhD, Maine State Geologist, Emeritus (1995-2021)

Chunzeng Wang, PhD, ,Universit of Maine, Presque Isle, Me.(1995-Pres.)

MCCA APPROVAL REQUEST MAINE COUNTY COMMISSINERS ASSOCIATION

—
After many drafts as a concept, this “Geoheritage” proposal will soon be finalized to paper and submitted to potential federal, public, and private funding sources. The authors have concluded that the inclusion of approvals (endorsements) by state, local, business and recreation entities will be important to the success of the proposal! The MCCA approval of our Geoheritage Proposal contributes to its success. The authors are prepared to give a Geoheritage presentation before the MCCA.

Geoheritage: (1) Geologic Heritage or “Geoheritage” is a descriptive term applied to sites or areas of geologic features with significant scientific, educational, cultural, or aesthetic value; (2) Culturally significant geoheritage are places where geologic features or landscapes played a role in cultural or historical events; (3) Aesthetically significant geoheritage sites include landscapes that are visually appealing because of their geologic features or processes.

The Geoheritage Program was formally organized and introduced at a two-day webinar at the University Arizona meeting hosted by: National Science Foundation (NSF), National Academy of Sciences (NAS), Geological Society of America (GSA), National Park Service (NPS), American Geological Institute (AGI), U.S. Geological Survey (USGS), American Association of State Geologists (AASG), National Association of Geology Teachers (NAGT), National Academy of Engineering (NAE) and Medicine (NAM), and Board of International Scientific Organizations-U.S. Committee for Geological Sciences.

***Respectfully Submitted,
Walter A. Anderson***
